## Overview

Cosmic Solutions is the leading supplier of Category Management and Profitability Planning services to the FMCG sector. Its software is developed in-house and are supported by vast experience of their use in practice. Its client base includes many leading multi-national businesses.

Due to the cost effectiveness of the solutions, the vast majority of clients recover the project costs within months of implementation.

An improvement to bottom line profitability of between 1 and 3% of revenue are typical results of implementing a Cosmic Solutions system.

## Products

Cosmic Solutions has a range of applications:

- > CS Range Manager
- > CS ProMatch
- > CS Insight Explorer
- > CS Store Explorer
- > CS Trade Planning
- > ProAct

## Approach

Our systems are designed to complement clients' transactional systems and enable them to derive most value from their other costly IT investments. They consolidate information from different sources to provide planning and decision support tools to the management team.

The systems are matched to the individual requirements of the client by customising the application around the client's work processes.
